Understanding Coding and Billing for Emergency Medicine Physicians

Comprehensive Coding, Billing & Reimbursement Services

Medical Reimbursement, Inc. (MRI) can manage every aspect of your revenue cycle—from coding, billing & reimbursement to third-party contract negotiation services—to deliver better results for your practice. Our thirty-plus years of emergency department (ED) revenue cycle management (RCM) expertise and knowledge about all aspects of the medical reimbursement process combine to deliver RCM solutions that have improved the bottom line of every single client we have served.

Coding

Our team guarantees technically accurate coding of each patient and will provide feedback on individual charts to improve documentation and reimbursement. Proper coding not only drives accurate reimbursement, but it also results in consistent fees and charges for your patients. Physicians who rely on our coding services have increased their average charge per visit 20%-40%.

Billing and Reimbursement

We specialize in providing compliant claims submissions and intensive payment follow-up to ensure the best results for each and every patient you treat. MRI clients have seen reimbursement increases of 20%-50% over those of their previous RCM vendors. Our comprehensive billing & reimbursement services include comprehensive record retrieval, chart check-in and auditing, visit data entry, claim filing, statement creation and distribution, payment posting, secondary/tertiary claims filing, denials processing, insurance follow-up, and collection services. We excel at electronic claim submission, remittance processing and thorough follow-up. As a result, our days receivable outstanding is below industry benchmarks.

READY TO LEARN MORE?

At MRI, we take great pride in our high client satisfaction rating and strong customer retention, which is accomplished through a relentless focus on delivering detailed and accurate coding, compliant claims submission and intensive payment follow-up. To find out how MRI can help improve your bottom line, contact us at (513) 281-4400, option 4.

Worry-Free Compliance

MRI understands the challenges of keeping up with changing healthcare regulations. To make sure that our services are compliant while capturing the maximum reimbursement for your practice, we conduct continuing education for our coding and billing professionals and perform regular quality assurance reviews. None of MRI's clients have ever been assessed any kind of penalty as a result of our RCM services.

No Hidden Fees

When you chose MRI as your RCM partner for complete coding, billing & reimbursement services you are getting more than just a billing vendor. Our clients receive the benefit of comprehensive services, industry expertise, and exceptional customer service all delivered for a single fee. You'll never see additional charges for statement and claims preparation, correspondence, or postage. In short, you will always know what you are going to pay based on the total value received.

Superior Technology

From our beginning, MRI has focused on developing a world-class technology foundation to support our delivery of superior physician RCM services. At the core of our business, we use athenahealth's Group Management platform (formerly GE's Centricity Group Management software) to automate workflows and support customized business processes. The Group Management software consists of multiple powerful modes for claims editing, claims monitoring and follow-up, and reporting. We use this and other proprietary state-of-the-art solutions to achieve new levels of efficiency and improve reimbursement for our clients. Our advanced workflows enable our staff to constantly monitor all outstanding claims and take the necessary action to ensure that any claim in question is adjudicated appropriately. The bottom line? Your practice will have a world-class infrastructure monitoring your entire revenue cycle to ensure the correct information is submitted and that you capture the maximum reimbursement as quickly as possible.

Bottom-line results for Emergency Medicine

For over thirty years the experts at **Medical Reimbursement, Inc**. have provided coding, billing and collection services to large academic teaching hospitals, large multi-site practices, smaller fee-for service-groups and hospital employed physicians throughout the United States. You can rest assured knowing that we have managed the RCM services for over 50 million ED visits and none of our clients have ever been penalized or sanctioned as a result of MRI's revenue cycle management services. In addition to a team of emergency medicine billing experts, Medical Reimbursement's proven processes have helped our clients experience double digit revenue increases in the first twelve months of service.
